

# Professional Endorsements

“The artificial green that National Greens installed in my yard is like nothing I have seen. It actually holds full shots and reacts like a real green. The surface is also very receptive to pitch shots and chip shots. The putting surface is true and the speed of the greens can be adjusted to your preference. I am very pleased with not only the quality of the work but more importantly the service that Jeremy Still has provided. The quality time that my family and I have spent and will spend on our green is priceless. It’s like we have our own golf hole in our front yard.

Country Club realness with true PGA ball speed and reaction characteristics.

Perfect for the Home.....

or the Office.

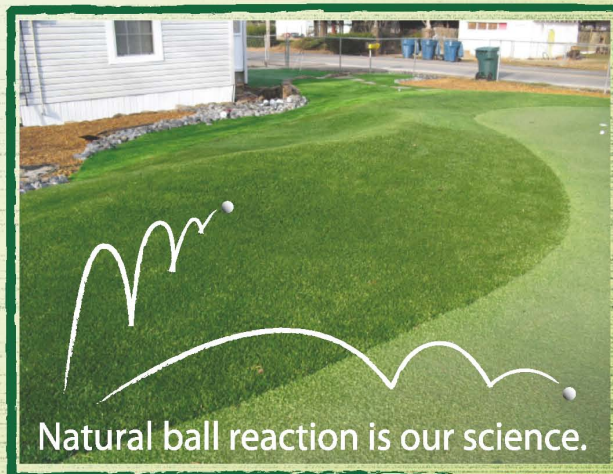

National Greens is highly specialized in the installation of sand filled and non/sand filled polypropylene putting turfs. Our greens are endorsed by several PGA professionals and have the same playing characteristics of a country club green. You can have a green as simple as an indoor short game or as complex as a multiple green golfers paradise with sand traps, chipping areas, and beautiful landscaped surroundings.
